Outperform

Cosmetics lead as device takes a breather

Key Points

- Pharma Research reported in-line 3Q results as cosmetics drove growth amid seasonal medical-device softness.
- Rejuran's brand strength supports our positive view, though launch delays and slower domestic device growth temper near-term optimism.
- Cut TP 27% as we apply a wider discount to Galderma, but maintain Outperform as an emerging cosmetics market and global expansion remain catalysts.

- **In-line 3Q.** Pharma Research reported 3Q sales of Won172bn (+27% YoY), with continued cosmetics growth and seasonal medical-device weakness. OPM of 37% was broadly in line with MQe of 36% but fell 9ppts YoY on a high base and higher cosmetics mix.
- **Cosmetics strengthen as a growth driver.** Domestic and overseas cosmetics sales rose 50% and 92% YoY, respectively, with Olive Young the key domestic growth driver. Overseas growth remained strong despite no EU orders, supported by Asia and the Americas. Management plans new channels in Taiwan (Cosmed), Hong Kong (Mannings), and the UAE (Watsons), while using its Silicon2 partnership to expand across Southeast Asia.
- **Seasonality and FX weigh on medical devices**. Medical-device sales rose 13% YoY but fell 10% QoQ. Domestic sales fell 11% QoQ as foreign visitor demand softened in July–August before recovering in September. Overseas sales fell 7% QoQ on lower shipments to Asia and CIS markets. Management highlighted Latin American opportunities, with an official Brazil launch planned for 2H27 and approval in Argentina in 1H26.
- **New product delay.** Management retained the RF device's early FY27 launch timeline but postponed the collagen skin-booster launch from early FY27 to FY28 because of a longer-than-expected regulatory process.

Earnings changes: We cut FY26 EPS by 12% following 3Q results and FY27E/28E EPS by 1%/2%, respectively, as we assume higher COGS due to a greater cosmetics sales mix.

Valuation: We cut our TP by 27% to Won370k (from Won510k) as we apply a larger discount to Galderma's multiple on stagnant domestic growth and early-stage overseas expansion (Fig 4).

Catalysts: PE involvement in operations, wholesale price hikes for injectables, rankings of cosmetics products on e-commerce platforms.

Investment Thesis and Recommendation

Global demand for Rejuran injectables is extending the franchise into cosmetics. Ongoing overseas expansion should sustain resilient profitability and support further re-rating. Prior Pharma Research reports.

Key Risks to Investment Thesis

- Increased domestic competition from other skin boosters.
- Poor management of overseas Rejuran distributors.
- Unclear management communication to investors regarding the growth outlook and strategy.
- Founding family inheritance overhang.

Company Description

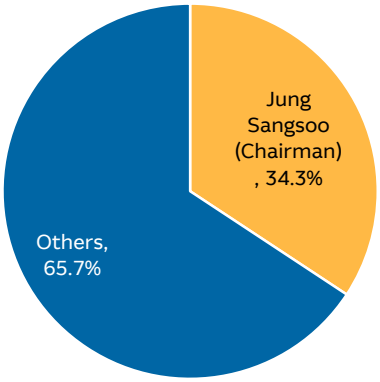

Pharma Research gained recognition with the launch of its signature skin booster, "Rejuran," in 2014. Pioneering the manufacturing technology for PDRN, a tissue-regenerative raw material sourced from Salmon DNA, underscores the company's innovative prowess. Expanding beyond medical aesthetic products, Pharma Research now offers a diverse portfolio encompassing cosmetics, pharmaceuticals, and health supplements
